

ORRIX H/P

Better wet & dry handling
Should & center block ratio improve handling performance to prevent abnormal wear

Excellent wet grip performance
Inside & Outside semi-open shoulder groove strengthens wet grip performance of tire

Enjoy silent, more comfortable driving.
Five pitch design improves dry and wet performance; making blocks smoother and improving driving comfort and reduce noise

EVERTON
-----*Ever Tire*-----

CONTRAL A/S

Design of single guide pattern groove provides excellent high speed handling performance in straight line.

The capillary groove structure provides better performance of braking and handling to ensure the safety of the four seasons.

Design of thin sipes pattern provide quiet and comfortable ride experience.

Multi-chip mould without porosity design for nice appearance.

CONTRAL VAN

Design of single guide pattern groove provides excellent high speed handling performance in straight line.

Acute angle pattern on shoulder helps improve the handling performance of four seasons.

Stronger carass construction helps effectively improve endurance and loading performance.

Open grooves are designed to provide excellent self-cleaning capability and outstanding traction.

EMT300

Uni-directional tread design
With large shoulder and center blocks give maximum traction in extreme road conditions.

Shoulder design
For minimizing cut injury under severe road conditions.

Unique shoulder blocks
protection strip and 3D sidewall
Enhance traction in mudd terrain conditions.

Special compound
For strong tread and high tear resistance performance.
